## Health and Wellbeing Centre for Research Innovation

<b>Project title:</b>	<b>Health and Wellbeing Centre for Research Innovation</b>
<b>Project duration:</b>	4 weeks
<b>Expected hours per week</b>	20-36 h
<b>Expected started date</b>	24 June 2024
<b>Number of scholarships available</b>	max of 2
<b>Location</b>	Project to be completed with a mix of remote and in-person activities. Some travel to Logan may be required in addition to UQ (St Lucia).
<b>Description:</b>	The student will have the opportunity to be involved in a range of research projects aligned with the Health and Wellbeing Centre for Research Innovation, a collaboration between UQ and Health and Wellbeing Queensland (Queensland health promotion agency). The student will be able to engage in a range of research activities which could include data collection, data management, literature reviews, scientific writing and partner-driven scientific discussions. The student can expect the work to fall within three themes of the centre, Healthcare (e.g. chronic disease prevention and management), Workplaces and Children and Young People, with respect to physical activity and nutrition related research and community programs.
<b>Expected outcomes and deliverables:</b>	The student can expect to learn and experience foundation research skills such as data management, qualitative and quantitative research methods, literature searches, scientific writing and communication skills. These experiences will be accrued in collaboration with industry partners (e.g. UQ Health Care) and Health and Wellbeing Queensland. It is expected that the student will establish their specific outcomes on the project in collaboration with the Centre at the start of the program as the breadth of work means that it can be tailored to each individual students experience and interest.
<b>Suitable for:</b>	This project would be suitable for students from Faculty of Health and Behaviour Sciences and those in programs where they are training to be health professionals. This does not have to be exclusively in physical activity/exercise or nutrition related areas, but an interest in these areas is important.
<b>Primary Supervisor:</b>	Dr Sjaan Gomersall
