

EDUC3006 Minor Professional Experience

Teaching Folio

Pass/Fail

due 7 August 2017, 12pm

The Minor Professional Experience Teaching Folio is a reflective task that draws on the AITSL *Australian Professional Standards for Teachers* and requires the use of evidence from practicum to demonstrate how key aspects of each Standard are met.

This folio will serve as a formative version of the Major Professional Experience Teaching Portfolio.

TASK

Reflecting on your experiences from your 3 week Minor Professional Experience,

1. Nominate Professional Standards

From each of the 7 Professional Standards, select 1 focus. That is, choose 7 foci in total but make sure that only 1 is from each Standard. For example, you might choose Standards 1.1, 2.3, 3.1, 4.4, 5.6, 6.2 and 7.3.

2. Select evidence to illustrate your practice

Use the best evidence from your teaching experience to demonstrate your chosen Standard(s).

Importantly, you may use 1 piece of evidence to illustrate multiple standards. For example, 1 inquiry based task may demonstrate Professional Standards 1.4, 2.2 and 3.1.

Evidence may include:

- Unit plans
- Lesson plans
- Learning resources you have developed, modified or analysed
- Assessment you have developed or analysed
- Student work examples and other evidence (such as a thank you card)
- Supervising teacher feedback and reports
- Reflections on class experiences, attendance at parent-teacher interviews, co- and extra-curricular activities. That is, provide a paragraph to describe this
- Photographs (ensure you seek permission).

3. Reflect

For each sample of evidence, write a short reflection that connects this evidence to the Professional Standards.

You must provide a brief description and justification to explain why your evidence meets the nominated Standard(s).

Please note: This document should meet the standard of an employment application. It should use pedagogical language and also be concise, reflective and evidence based.

Examples are provided in Blackboard. You should use these templates.
